## Our Beginnings

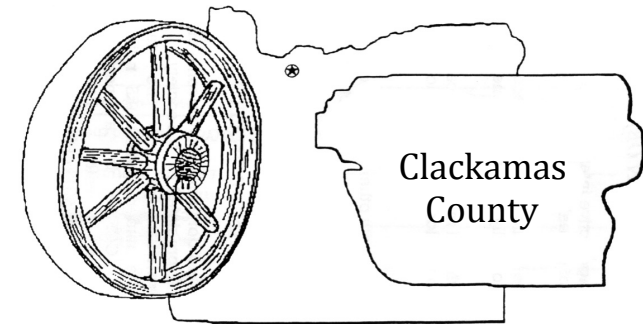

CCFHS was founded in 1988 by a small group interested in the preservation of local family history. It would take two years before establishing their small library in its current location at the Territorial Museum. Both were in their infancy. A few shelves of books and materials continued to multiply over the years through private and public donations of books, family files, vital records being electronically replaced, and trading materials with other Societies. Today, we house a treasure of resources.
